Pathology Report

LTM Order #: 2017029177

12 July 2017

History:

Customer	RSI Biotech
Strain:	Hartley
Species:	Guinea pig
Notes:	Pay by credit card

Gross Observations:

Refer to Health Monitoring Pathology Results Report.

Microscopic Diagnoses:

#1: Gall Bladder: Within normal limits.

#2: Liver: Vacuolation, hepatocellular, lipid-type, portal, bridging, moderate, multifocal. Mineralization, subcapsular, mild, focal.

Comment:

The microscopic changes were considered to be incidental findings of no colony health significance.
